

Educators

Bring STEM to Life! Connect your students with a STEM Ambassador

Bring real-world STEM experiences into your classroom or club and show young people the exciting possibilities in science, technology, engineering, and maths.

Who are STEM Ambassadors?

Passionate role models from all walks of life, STEM Ambassadors volunteer to inspire young people, bring STEM to life, highlight career paths, and ensure a safe, supportive environment through DBS/PVG checks and safeguarding training.

By connecting with our STEM Ambassadors you'll:

- connect students with professionals from diverse STEM careers
- bring hands-on activities, workshops, and inspiring talks
- offer real-world context to classroom learning
- link STEM to real careers and support students' growth, skills, and attitudes (helping you meet Gatsby Benchmarks and the Personal Development Framework)

STEM Ambassadors
to enhance teaching
& learning

What a STEM Ambassador can offer?

- online or in-person mentoring and advice
- inspiring careers talks and presentations
- hands-on activities and workshops
- help with STEM after-school activities like coding clubs
- support with STEM competitions and challenges

The benefits:

- inspire young people and develop their love for STEM
- offer real-world context to classroom learning
- allow young people to meet diverse role models
- improve a young person's career aspirations in STEM
- help you to meet careers educator benchmarks in schools

How does it work?

- Simply post your [request for a STEM Ambassador](#) to our digital platform, or search thousands of offers of support.

Discover courses, resources and other opportunities for educators and young people at stem.org.uk

“It has definitely helped learners to realise the scope of different careers within STEM, and it led to them doing more research in their own time and linking it to their learning in class.”
